

Principal's Message

Students who find their own voice in supportive schools are more likely to develop a confident voice, a capacity to act in the world and a willingness to lead others. Student engagement is enhanced when students feel able to exert influence and participate more fully in the classroom, school and community.

Voice, agency and leadership represent different aspects of student empowerment. Each aspect relies on a student's belief that they are both supported and empowered, in ways that help them to develop their knowledge, skills and dispositions in the classroom, school and community. This requires a deliberate, planned and coherent approach to embedding voice, agency and leadership within a positive climate for learning.

At Miranda North we are placing focus and commitment upon this important aspect of the curriculum. The student leadership team has been expanded to include a Student Representative Council who work alongside our Student Leadership Team and Sports Captains. Staff members are currently developing programs and initiatives in collaboration with our transformational learning community of practice partner schools, to strengthen opportunities for the development of student voice, agency and influence.
